

A clean environment is our top priority.

Will you help us contribute to a cleaner environment by recycling diapers?

For you, dirty diapers are a form of waste that you want to get rid of as quickly as possible, but for us they are a source of valuable raw materials.

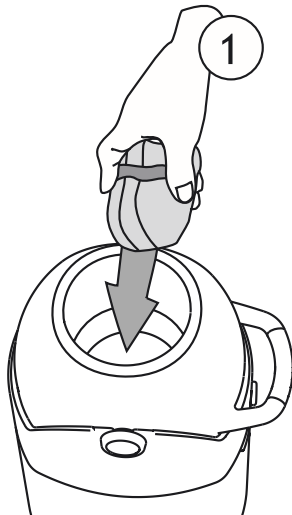

When you change your baby, do you want to put the used diapers in our diaper pail?

You can literally turn away the diapers!

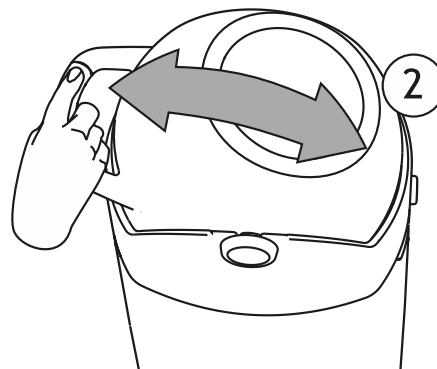

Verschoon ensures that these diapers are brought to Nijmegen where they are recycled using modern techniques into new products such as plastic granules, biogas and manure.

It's that easy:

Place the diaper in the top of the pail

Turn the top with the handle

When disposing of your waste, keep the following in mind:

This waste is allowed in the pail

- Diapers
- Diaper Pants
- Pyjama Pants
- Swimming Diapers
- Baby Wipes
- Diaper Bags

This waste is *NOT* allowed in the pail

- Gloves
- Washcloths
- Sanitary Pads, Tampons, etc.
- Packaging, Jars or Tubes
- Ostomy Waste
- Other Waste

You can deposit the remaining waste in the appropriate bins.

Scan the code or go to <https://link.verschoon.nl/infosheet> for more information about diaper recycling.

You can also visit this website for a non-binding consultation for collecting the used diapers from your home.
